Microsoft Cognitive Services

Give your apps a human side

Vision

From faces to feelings, allow your apps to understand images and video

Speech

Hear and speak to your users by filtering noise, identifying speakers, and understanding intent

Language

Process text and learn how to recognize what users want

Knowledge

Tap into rich knowledge amassed from the web, academia, or your own data

Search

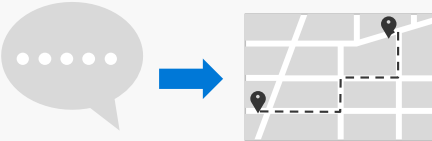

Access billions of web pages, images, videos, and news with the power of Bing APIs

Labs

An early look at emerging Cognitive Services technologies: discover, try and give feedback on new technologies before general availability

A variety of real-world applications

Why Microsoft Cognitive Services?

Easy

Roll your own with REST APIs
Simple to add: just a few lines of code required

Flexible

Integrate into the language and platform of your choice
Breadth of offerings helps you find the right API for your app
Bring your own data for your custom experience

Tested

Built by experts in their field from Microsoft Research, Bing, and Azure Machine Learning
Quality documentation, sample code, and community support

GitHub

Demo

Intelligent Kiosk

Vision

Computer Vision API

Distill actionable information from images

Face API

Detect, identify, analyze, organize, and tag faces in photos

Emotion API

Personalize experiences with emotion recognition

Content Moderator

Machine-assisted moderation of text and images, augmented with human review tools

Custom Vision Service

Customizable web service that learns to recognize specific content in imagery

Video Indexer

Process and extract smart insights from videos

Speech

Bing Speech API

Convert speech to text and back again, and understand its intent

Speaker Recognition API

Give your app the ability to know who's talking

Custom Speech Service

Fine-tune speech recognition for anyone, anywhere

Knowledge

Academic Knowledge API

Explore relationships among academic papers, journals, and authors

Knowledge Exploration Service

Add interactive search over structured data to your project

Entity Linking Service

Contextually extend knowledge of people, locations, and events

Recommendations API

Provide personalized product recommendations for your customers

Custom Decision Service

Create custom experiences with adaptive, contextual decision-making

QnA Maker

Distill information into conversational, easy-to-navigate answers

Search

Bing Web Search API

Connect powerful search to your apps

Bing Image Search API

Bring advanced image and metadata search to your app

Bing Video Search API

Trending videos, detailed metadata, and rich results

Bing News Search API

Link your users to robust and timely news searches

Bing Autosuggest API

Give your app intelligent autosuggest options for searches

Bing Entity Search

Enrich user experiences with contextual entity search results

Bing Custom Search

Create a highly-customized web search experience

Pricing

With Microsoft Cognitive Services you are only charged for what you use. Services typically have multiple tiers (e.g. free, standard) and users are charged for calls to the API.

For example here are the tiers and transaction charges for the *Face API*:

TIER	FEATURES	PRICE
Face API – free	Up to 20 transactions per minute	30,000 free transactions per month
Face API – standard	Up to 10 transactions per second	
	0–1,000,000 transactions	\$1.50 per 1,000 transactions
	1,000,001–5,000,000 transactions	\$1.10 per 1,000 transactions
	5,000,001–20,000,000 transactions	\$0.65 per 1,000 transactions

Thank You!
