# Microsoft Cognitive Services

Give your apps a human side

## Vision

From faces to feelings, allow your apps to understand images and video

## Speech

Hear and speak to your users by filtering noise, identifying speakers, and understanding intent

## Language

Process text and learn how to recognize what users want

## Knowledge

Tap into rich knowledge amassed from the web, academia, or your own data

## Search

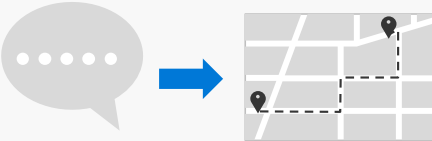

Access billions of web pages, images, videos, and news with the power of Bing APIs

## Labs

An early look at emerging Cognitive Services technologies: discover, try and give feedback on new technologies before general availability

# A variety of real-world applications

# Why Microsoft Cognitive Services?

## Easy

Roll your own with REST APIs  
Simple to add: just a few lines of code required

## Flexible

Integrate into the language and platform of your choice  
Breadth of offerings helps you find the right API for your app  
Bring your own data for your custom experience

## Tested

Built by experts in their field from Microsoft Research, Bing, and Azure Machine Learning  
Quality documentation, sample code, and community support

GitHub

# Demo

<https://github.com/Microsoft/Cognitive-Samples-IntelligentKiosk>

# Vision

## Computer Vision API

Distill actionable information from images

## Face API

Detect, identify, analyze, organize, and tag faces in photos

## Emotion API

Personalize experiences with emotion recognition

## Content Moderator

Machine-assisted moderation of text and images, augmented with human review tools

## Custom Vision Service

Customizable web service that learns to recognize specific content in imagery

## Video Indexer

Process and extract smart insights from videos

# Speech

## **Bing Speech API**

Convert speech to text and back again, and understand its intent

## **Speaker Recognition API**

Give your app the ability to know who's talking

## **Custom Speech Service**

Fine-tune speech recognition for anyone, anywhere

# Language

## **Bing Spell Check API**

Detect and correct spelling mistakes within your app

## **Web Language Model API**

Leverage the power of language models trained on web-scale data

## **Linguistic Analysis API**

Easily parse complex text with language analysis

## **Language Understanding Intelligent Service**

Teach your apps to understand commands from your users

## **Text Analytics API**

Detect sentiment, key phrases, topics, and language from your text

## **Translator**

Easily perform speech and text translation

# Knowledge

## **Academic Knowledge API**

Explore relationships among academic papers, journals, and authors

## **Knowledge Exploration Service**

Add interactive search over structured data to your project

## **Entity Linking Service**

Contextually extend knowledge of people, locations, and events

## **Recommendations API**

Provide personalized product recommendations for your customers

## **Custom Decision Service**

Create custom experiences with adaptive, contextual decision-making

## **QnA Maker**

Distill information into conversational, easy-to-navigate answers

# Search

## Bing Web Search API

Connect powerful search to your apps

## Bing Image Search API

Bring advanced image and metadata search to your app

## Bing Video Search API

Trending videos, detailed metadata, and rich results

## Bing News Search API

Link your users to robust and timely news searches

## Bing Autosuggest API

Give your app intelligent autosuggest options for searches

## Bing Entity Search

Enrich user experiences with contextual entity search results

## Bing Custom Search

Create a highly-customized web search experience

# Microsoft Cognitive Services Labs

An early look at emerging Cognitive Services technologies:  
discover, try, and give feedback on new technologies before general availability

## **Project Prague**

Gesture based controls

## **Project Cuzco**

Event associated with Wikipedia

## **Project Johannesburg**

Route logistics

## **Project Nanjing**

Isochrones calculations

## **Project Abu Dhabi**

Distance matrices

## **Project Wollongong**

Score location attractiveness

# Pricing

With Microsoft Cognitive Services you are only charged for what you use. Services typically have multiple tiers (e.g. free, standard) and users are charged for calls to the API.

For example here are the tiers and transaction charges for the *Face API*:

TIER	FEATURES	PRICE
Face API – free	Up to 20 transactions per minute	30,000 free transactions per month
Face API – standard	Up to 10 transactions per second	
	0–1,000,000 transactions	\$1.50 per 1,000 transactions
	1,000,001–5,000,000 transactions	\$1.10 per 1,000 transactions
	5,000,001–20,000,000 transactions	\$0.65 per 1,000 transactions
