Azure Boards

Plan, track, and discuss work across your teams

Getting Started: <https://azure.microsoft.com/services/devops/boards/>

Documentation

Start using Azure Boards

Sign up and get started using Azure Boards.

Work items

Track code defects and user stories, capturing discussions along the way.

Boards (Kanban)

Manage the continuous flow of work from concept to completion.

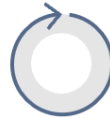

Backlogs

Create and organize your backlogs, track features, users stories, and bugs.

Azure Boards & GitHub

Use Azure Boards to plan and track work, linking to your GitHub commits and pull requests.

Sprints (Scrum)

Plan a sprint, use a taskboard in daily scrums, monitor sprint burndown.

Queries

Find work items to bulk update and to chart progress and trends.

Plans and Agile at scale

Grow your organization, support autonomous teams, and gain visibility across teams.

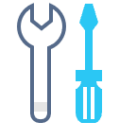

Feedback

Request and capture feedback on your working apps.

Customization

Configure tools and processes to meet your team's needs.

Settings

Configure resources for Azure Boards.

Settings

Default permissions and access for Azure Boards.
