Azure DevOps

## Azure DevOps Hands-On Labs

Evaluating your next DevOps tool chain? Want to dive deeper and learn how you can implement modern DevOps practice?

Learn to plan smartly, collaborate better, and ship faster with a set of modern development services.

### Getting started

Simplify and speed up the DevOps process with Azure DevOps services. The following labs will help you to get started with Azure DevOps services to automate software delivery and meet business needs.

- Agile Planning and Portfolio Management with Azure Boards
- Enabling Continuous Integration with Azure Pipelines
- Exploratory Testing with Azure Test Plans
- Managing Technical Debt with Azure DevOps and SonarCloud
- Version Controlling with Azure Repos
- Embracing Continuous Delivery with Azure Pipelines
- Web Application Load and Performance Testing
- Collaborating with Azure DevOps Wiki

# DevOps Pipelines in Minutes

## Azure DevOps Projects

→ Create a full DevOps pipeline with 3 easy steps from the Azure Portal

→ Start with a Git repo and any source language

→ Web apps, Kubernates, soon VMs and more.

→ Customize, extend and scale when needed.

→ https://docs.microsoft.com/en-us/azure/devops-project/

Thank You!

# Documentation - Azure Services Index

**Use this end-to-end index to learn about all the services available in Azure**

→ Use this end-to-end feature index to learn about all Azure services.

→ If you only save one Favorite in your browser related to Azure, this is the link to save as a favorite!

→ Most topics contain Quickstarts and Tutorials allowing you to gain hands-on experience quickly
